## Why we prefer Stainless Steel for Cookware

Stainless Steel has long been the first choice of producers, designers and users of cookware because of the fact that stainless steel products do not stain, chip or rust, are robust and do not affect the flavor of the food, plus their easy cleaning maintenance makes it the first choice for strict hygiene conditions such as found in hospitals, kitchens, abattoirs and other food processing plants.

Stainless steel's bright, easily maintained surface provides a modern look and attractive appearance. What's more, being fully recyclable, stainless steel has good environmental credentials.

For pots and pans optimum heat transfer is achieved using a triple bottom in stainless steel, aluminium and stainless steel. This heavy duty bottom has a "sandwich" construction with the aluminium enclosed by stainless steel.

With this professional bottom, OZTI pots and pans are perfect for use on any kind of stove whether induction, electrical, glass ceramic or gas.

Stainless steel pots are available in either a smooth satin polished finish or shiny mirror finish or may be semi-satin semi mirror as well.

# Thermotrans

OT300

The Thermotrans are ideal units for the transportation of hot and cold foods with their special construction of polypropylene external body and polyurethane isolation material ( FCKW free ).

Gastronorm Containers between 2,5 and 28 liter capacity can be placed into the Thermotrans and the proper usage of Gastronorms Containers with silicon lid prevents spilling of the foods.

The Thermotrans are stackable and dishwasher safe. Heat & Cold resistant for +100 und -40 ° C.

Thermotrans ist eine spezialkonstruktion. Die Außenschicht besteht aus Polypropylen und Innen ist sie durch Polyurethan isoliert. Thermotrans eignet sich somit ideal für den Transport von kalten und warmen Speisen.

Gastro-Behälter mit einer Kapazität vor 2,5 und 28 Liter können in den Thermotrans Platz finden. Thermotrans verhindert in Kombination mit silikonbeschichteten Gastro-Behälter das Überlaufen der Speisen.

Die Thermotrans sind stapelbar und Spülmaschinenfest Heiß und Kalt resistent bei Temparetuen von +100 bis -40°C.
